

What is it?

CCIMREDEX is a dynamic and cutting edge property data exchange
Neutral - Web based - Repository of commercial property data

What type of data?

- Transactional
For sale & For lease
- Non-transactional
Property location, description, financial history, sales and lease history
- Create, update and delete, search, map, and report on properties in the database

Who is it for?

CCIMREDEX is created as a benefit to the members of the CCIM Institute – To make you more productive and make the commercial real estate market more efficient

What can it do for you?

Get the word out - with more exposure for your property in less time!

CCIMREDEX allows you to enter property data once and automatically submit that data to a variety of listing services providing local, regional and national exposure

Single Data Entry

Research, analyze and market your property all at once!

CCIMREDEX has the capacity to fully integrate with the industry's top marketing, analytical & financial products

Once entered, you can exchange the data with participating 3rd party applications, eliminating the need to enter the property information more than once

Within CCIMREDEX you can:

- Complete a financial analysis
- Obtain demographics, maps and aerials
- Create, print and email property flyers
- Create and mail brochures, postcards and other print material
- Create a dynamic website for your clients to access your property information

CCIMREDEX is coming the 4th quarter of 2009!
